

CRYSTAL SUCCULENT GARDEN *Bright light, Low-maintenance*

Adorned with a gorgeous amethyst crystal, this fun mix of small succulents is as low-maintenance as it gets. Place in bright indirect light or a space that receives a few hours of morning sun. Check the soil for dampness once every week or so. If dry, add about a cup of water, keeping in mind that any excess will build up in the bottom and should be avoided. Water should be applied to soil, not to the plants themselves.

GEOGRAPHIC ORIGIN:

Africa and the Americas

GREAT FOR: Bright light**FEATURES:**

Low Maintenance

GROWTH RATE: Slow**LIGHT**

Place in bright indirect light or a space that receives a few hours of morning sun. In hot summers, more shade may be necessary.

**LEVEL OF CARE**

Easy! Just place in bright sunlight and don't overwater.

**FERTILIZER**

Feed with a mild cactus fertilizer about once a month during the growing season. Do not fertilize in winter.

**PRUNING & PROPAGATION**

Prune damaged areas by cutting to the stem. To propagate, plant cuttings in soil.

**WATER**

Check the soil for dampness once a week. If dry, add about a half cup of water, keeping in mind that any excess will build up in the bottom and should be avoided.

**TEMPERATURE**

Normal household temperatures 60-80F are best.

**SOIL**

When repotting the succulents, use a well-draining Cacti/Succulent Potting Mix for best results.

**PET FRIENDLY?**

Sorry! While some succulents are non-toxic if consumed by pets, others can be mildly toxic. Love succulents? Play it safe and opt for an Echeveria or other pet-friendly plant.
