

ECHEVERIA *Bright light, Low-maintenance*

An Echeveria succulent with rosette leaves is planted in a speckled ceramic pot with a seafoam green band. Echeverias come in mostly pastel colors with a pearlescent sheen on smooth foliage. Echeverias will send up a tall flower stalk if given ample lighting conditions. Place in bright indirect light or a space that receives a few hours of morning sun. Check the soil for dampness once a week. If dry, add about a quarter cup of water, keeping in mind that any excess will build up in the bottom and should be avoided. Water should be applied to soil, not to the plant itself.

GEOGRAPHIC ORIGIN:

Africa and the Americas

GREAT FOR: Bright Sunlight**FEATURES:**

Low Maintenance; Pet-Friendly

GROWTH RATE: Slow**LIGHT**

Place in bright indirect light or a space that receives a few hours of morning sun. In hot summers, more shade may be necessary.

**LEVEL OF CARE**

Easy! Just check the soil for dryness weekly and avoid too much direct sunlight.

**FERTILIZER**

Feed with a mild cactus fertilizer about once a month during the growing season. Do not fertilize in winter.

**PRUNING & PROPAGATION**

Prune damaged areas by cutting to the stem. To propagate, plant cuttings in soil.

**WATER**

Check the soil for dampness once a week. If dry, add about a half cup of water, keeping in mind that any excess will build up in the bottom and should be avoided.

**TEMPERATURE**

Normal household temperatures 60-80F are best.

**SOIL**

When repotting the succulents, use a well-draining Cacti/Succulent Potting Mix for best results.

**PET FRIENDLY?**

Yes! Echeverias pose no risk if consumed by pets.
