

LUCKY ELEPHANT SET *Great for Bright Sunlight*

An assortment of succulents is planted in matching cream-glazed Lucky Elephant ceramic pots. Place in bright indirect light or a space that receives a few hours of morning sun. Check the soil for dampness once a week. If dry, add about a quarter of a cup of water to the Baby and about a half of a cup to the Mama, keeping in mind that any excess will build up in the bottom and should be avoided. Water should be applied to the soil, not to the plants themselves.

GEOGRAPHIC ORIGIN:

Africa & the Americas

GREAT FOR: Bright Sunlight

FEATURES:

Low Maintenance

GROWTH RATE: Slow

LIGHT

Place in bright indirect light or a space that receives a few hours of morning sun. In hot summers, more shade may be necessary.

WATER

Check the soil for dampness once every week or so. If dry, add about a quarter cup of water. Water should be applied to soil, not to the plant itself.

DIFFICULTY

Easy! Just check the soil for dryness weekly and avoid too much direct sunlight.

TEMPERATURE

Normal household temperatures 60-80F is best.

FERTILIZER

Feed with a mild cactus fertilizer about once a month during the growing season. Do not fertilize in winter.

SOIL

When repotting, use a well-draining Cacti/Succulent Potting Mix for best results.

PRUNING & PROPAGATION

Prune damaged areas by cutting to the base. To propagate, cut offset pups from the parent plant and allow to dry 24 hours before repotting.

PET FRIENDLY?

Sorry! While some succulents are non-toxic if consumed by pets, others can be mildly toxic. Love succulents? Play it safe and opt for an Echeveria or another pet-friendly plant.
