

BABY UNICORN SUCCULENT *Pet-friendly, Great for Bright Sunlight*

A succulent with rosette leaves are planted in a stoneware Unicorn planter with a multi-color iridescent finish. Place in bright indirect light or a space that receives a few hours of morning sun. Check the soil for dampness once a week. If dry, add about a quarter of a cup of water, keeping in mind that any excess will build up in the bottom and should be avoided. Water should be applied to the soil, not to the plant itself.

GEOGRAPHIC ORIGIN:

Africa & the Americas

GREAT FOR: Bright Sunlight

FEATURES:

Low Maintenance

GROWTH RATE: Slow

LIGHT

Place in bright indirect light or a space that receives a few hours of morning sun. In hot summers, more shade may be necessary.

DIFFICULTY

Easy! Just check the soil for dryness weekly and avoid too much direct sunlight.

FERTILIZER

Feed with a mild cactus fertilizer about once a month during the growing season. Do not fertilize in winter.

PRUNING & PROPAGATION

Prune damaged areas by cutting to the base. To propagate, cut offset pups from the parent plant and allow to dry 24 hours before repotting.

WATER

Check the soil for dampness once every week or so. If dry, add about a quarter cup of water, keeping in mind that any excess will build up in the bottom and should be avoided.

TEMPERATURE

Normal household temperatures 60-80F is best.

SOIL

When repotting, use a well-draining Cacti/Succulent Potting Mix for best results.

PET FRIENDLY?

Sorry! While some succulents are non-toxic if consumed by pets, others can be mildly toxic. Love succulents? Play it safe and opt for an Echeveria or another pet-friendly plant.
