

PHILODENDRON BIRKIN *Philodendron Birkin*

The Philodendron Birkin features round or oval light-green leaves with silver-white patterns and dark-green edges. Philodendron Birkins are generally prized for foliage that stands out in any setting! Growing beautiful new leaves monthly, the Philodendron Birkin is the perfect plant for spaces with bright indirect to low sunlight.

GEOGRAPHIC ORIGIN:

South America

GREAT FOR: Moderate Sunlight**FEATURES:**

Unique Foliage, Air Purifying

GROWTH RATE: Moderate**LIGHT**

Prefers bright, indirect light but can tolerate low light as well. Avoid direct sunlight.

**WATER**

Prefers soil to partially dry out between waterings so check about once a week.

**DIFFICULTY**

Easy! Just avoid direct sun and don't overwater.

**TEMPERATURE**

Prefers warm conditions 65-80°F. Keep away from drafty windows and air conditioners.

**FERTILIZER**

Feed with a liquid, indoor plant fertilizer about once a month during the growing season. Do not fertilize in winter.

**SOIL**

A peaty All-Purpose potting soil with good drainage works best.

**PRUNING & PROPAGATION**

Prune damaged or yellow leaves by cutting to the stem base. To propagate, place stem cuttings with leaves in water until ready to repot.

**PET FRIENDLY?**

Sorry! Plant contains very sharp calcium oxalate crystals that, when eaten, cause mouth and digestion irritation.
